

Home Clearing

The Genius Biofeedback system can be used to harmonize your home or any space. It can be used to clear the energy of your street or your city. This is a very powerful way to shift your world. This section explains home clearing specifically. It can be used with or without the Home Clearing Libraries. Home Clearing Libraries add specific elements for testing such as Geopathic Stress, EMF Stress, problems in the home such as leaks and even energetic imprints from past owners! You can get the Home Clearing Libraries here: [Home Clearing Libraries](#)

How do you feel in your space when you clear your space?

How do do a Home Clearing and Harmonizing session:

1. Enter the address including street, city and zip code as the client.
2. Date of birth is the approximate date you moved into the space. This is the birth of the space into your consciousness.
3. Gender is up to you.
4. Record the "sounds of your house" by standing silently in the space and hitting the record button. It turns out that your home has its own speech including the humming of the heater or various subtle sounds in the home.
5. Go outside and take a picture of the home or space.
6. Chakras - your home has energy centers similar to chakras. Place these down in the Main Hold tray (lows and highs).
7. Meridians - Also amazing energy centers that while they are not an exact correlate in the home, appear to be powerful in clearing energy of a space.
8. Use any of the Home Clearing Panels or all of them, using the reds and blues and place in the lower tray.
9. Also include the highs and lows from the following panels. Highs and lows mean either just the reds and the blues or anything under 200 or over 600 if there are very few red and blue items. Run these panels for your space: Sacred Geometry, Solfeggio Tones, Spiritual Protection and Flower Essences. Run ANY other panels you feel intuitively drawn to run for your space. Place all items in the Main Hold Tray.
10. Run in Progressive Insights for 8 minutes. Experience the new and refreshed energy in your home.

You can do a similar process for your city, state, country and the world! Enjoy!
