

Dear _____,

I wanted to let you know about an incredible innovation I have discovered. It is called the Genius Biofeedback system. It is a bioresonance tool that evaluates your voice and picture to help you learn more about yourself and the world around you! It provides a scan that reveals so much about the body, mind and spirit and gives you personalized frequencies to run for yourself each time you do a scan.

I personally have experienced incredible transformation from using this system. Just knowing that I can scan myself daily to learn more about any emotional blocks that I am having or any particular issues that I could become aware of has helped me tremendously!

The Genius is easy to learn with a little effort and it goes anywhere that you do. You can use it on any phone or tablet, like an iPad. I wanted to invite you to download the program and use it for free for 14 days. During the 14 days, you can receive free tutorials and a mini-course that teaches you all about how to get started. Here is the link for the 14 Day download:
