

Understanding Your Terahertz Technology

What are Terahertz frequencies?

Terahertz frequencies are found between **far-infrared rays and microwave energy**. They refer to electromagnetic waves with frequencies in the range **0.1 to 10 THZ**. Researchers have been discovering exciting health benefits of terahertz therapy on the human body.

These special frequency waves can benefit **3-5 centimeters of human skin** so they can **act at a deeper level in the body**. This will work both on skin and through clothing. The frequencies directly act on the deep tissue as a result. One of the first things people report is the reduction of their experience of **pain and inflammation**. It is a great benefit to have a frequency that can go more than "skin deep". This ability to benefit is enhanced by the heat within the terahertz technologies. This helps to **vasodilate the skin cells** in order to go deeper as well as create the beneficial effects of hyperthermia.

What we are learning about the **effects of this technology** is very exciting! They **supplement the energy of cells**, regulate the physiological functions of the body and accelerate the generation of wellness in the body.

Some of the benefits that clients have reported and have been observed include:

- Overall increase in energy
- Feelings of relaxation
- Reduced blood viscosity
- Enhanced immunity
- Skin rashes and issues like psoriasis have improved after a few sessions
- Inflamed areas seem to get better
- Have a positive impact on the cells
- Organs become active again
- Nervous system becomes unblocked

How does it work?

There appears to be something significant about the exact resonance of these frequencies and our cells seem to respond very positively to this resonance. Reports of benefits include the powerfully cellular hydration and the creation of harmony and metabolism within the cell. The high frequency vibration creates a powerfully therapeutic movement within the cells. This "exercise" helps to tone up the cells and increase the excretion of water.

Understanding Your Terahertz Technology

How can I best use Terahertz Technology?

Plan on having a daily application of your Terahertz Core Box and/or Terahertz Wand. These are powerful technologies. Do each area mentioned for 30 seconds with some warmth setting, if you are comfortable with this and if there are no contraindications. Drink 1 glass of room temperature or slightly warm water. You can blow the terahertz frequencies to your glass of water for 15-30 seconds for added benefit!

- **Lymphatic drainage points** - Run the terahertz at the sides of the neck, under the arms, behind the knees, and at the groin. These are the major lymphatic drainage areas. Apply the Terahertz Core Box or Wand to these drainage points for 30 seconds at a time. Cover both left and right sides of the body. Repeat the process about 3-6 times.

Use a vertical motion over the main Chinese Meridian Channels

Benefits of Red Light

Assists the Mitochondria - powerhouse of the cell. This helps us to produce energy in the body, including the muscles, the heart, the lungs and more. Helps to reduce wrinkles, fine lines and even age spots. Has improved hair growth in people. May help to clear acne.

Red light stimulates collagen production, which helps skin to look young. There have been several studies about the benefits of red light. Some of these were published in the 2013 issue of Seminars in Cutaneous Medicine and Surgery. These benefits were noted:

- Wrinkle reduction
- Reduction of color patches and hyperpigmentation
- Accelerated repair in the epithelial layer
- Accelerated wound healing
- Improvement in conditions including acne, vitiligo, herpes virus sores and psoriasis

Red light also slows hair loss! And, red light therapy has been shown to assist in the regrowth of hair in several studies

Understanding Your Terahertz Technology

Benefits of Blue Light

Blue light is a high energy, high penetration visible light with a wavelength of 380 - 500 nanometers. Blue light has been associated with the ability to kill bacteria, help to create a good environment to grow new cells, promote the production of collagen and more!

Benefits of Hyperthermia

The warm setting on your Terahertz creates a condition in the body known as hyperthermia. This is basically the effect caused by the consistent application of heat. It has been used to work with small tumors (eliminating them). It very likely helps to reduce viruses and bacteria, which do not do well at high temperatures.

Hyperthermia includes directed application of thermal energy. The aim of that therapy is to overcome the body's natural thermoregulation mechanism through application of external heat sources such as electromagnetic radiation of various frequencies.

A history of application of hyperthermia in medicine, especially in rheumatic diseases, dates back to the beginning of the 20th century. As early as in 1929 Neyman and Osborne described the employment of high-frequency currents in the production of fever.

The systemic effect of hyperthermia causes activation of various functions of mononuclear cells, including increase in globulin synthesis and protection of WEHI-175 cells against apoptosis induced by TNF- α . Furthermore, the beneficial actions of hyperthermia include an analgesic effect and reduction of skeletal muscle and tendon tonus. This can be perceived as a reduction of pain in the body.

Also, hyperthermia increases significantly serum cortisol, plasma norepinephrine, and plasma epinephrine concentrations compared to controls. It is possible that the observed changes in the function of blood mononuclear cells may be induced by elevated levels of stress hormones

Success Stories

Itching relieved in 2 sessions

Poison Ivy better in 2 Sessions! A client discovered she had been exposed to Poison Ivy. Within a short time, the itching and pain of blisters became overwhelming.

Before Terahertz

After 2 Sessions

These are the results after just 2 sessions. Each session was 15 minutes long and used the Gold 7.0 Wand. She was thrilled with the results!

Husband's Toe Infection has improved

From Deborah S: My husband has had a fungal toe for 35 years. Not sure if it's the combination of adding the Terahertz to his regimen, but that stubborn toe is now growing in pink for the first time in 35 years! This after using EVERYTHING under the sun to attempt a cure including both internal and external herbs, potions, salves, multiple podiatrist visits etc. The improvement has been noticeable! We are so happy with this Terahertz technology!

Understanding Your Terahertz Technology

Psoriasis Cleared Up after 20 Years

From Jenny H: My psoriasis is clearing up after 20 years! I also have not have to take any pain relievers after being on daily pain relievers for the last 2 years. This pain was due to an injury that turned into arthritis. The Core Box is incredible! I also Terahertz water each and every day. Here is a picture of my set-up:

Water Set Up 1

Water Set Up 2

Thinning skin is now improving

From Karen G: My husband's skin has been thinning. When he gets a small bruise, it tends to last for a while. When he used the Terahertz Core Box, it was gone in 2 treatments. Truly amazing! He was skeptical, but now he uses the Core Box all the time.

Understanding Your Terahertz Technology

Debilitating shoulder pain is better

Lisa N: My husband had shoulder pain so bad he could barely work. He was getting some relief from over the counter pain relievers. He was very skeptical when I proposed using the Terahertz Core Box. Eventually, he agreed to a session. I worked on the Lymphatic Drainage Points as well as his neck and shoulder. Before his pain was 8 of 10 (meaning severe). The total time of the treatment was 18 minutes of Terahertz application with the Core Box. His pain went the 8 out of 10 down to a 2 out of 10 (meaning very low!). He said, "Holy smokes! That works better than the pain relievers I have been using." He is very surprised by also very happy. Thank you!

Boston Terrier's Leg was locked!

Paula S: A Boston Terrier came in for a treatment. His back legs were bothering him and he could not lift his leg to urinate. I applied Terahertz to his spine and belly with about 2 cycles of 1-2 minutes repeated about 6 times. He stood up like a champ! He has been moving around so much easier and the owners are thrilled. Very satisfying result!
